

Ralston Elementary would like to thank the **Golden Schools Foundation** for providing grant money to support our **STEM Enrichment**. The award Ralston received from GSF was used to fund our annual **Science Day**.

Ralston's annual Science Day is an exciting event for the school. Every fall, outside organizations are brought in to present a science topic to each grade. Past presenters have come from the Denver Museum of Nature and Science, CU Science Discovery, the Butterfly Pavilion, the Denver Zoo, as well as others.

Not only do we want to supplement what our teachers are teaching in the classroom, but expose the students to science ideas and concepts they may not get from their normal classroom instruction. Who knows what may spark a student's interest in a career in Science?
